

# CRYSTAL

**High Resolution, 3-5  $\mu\text{m}$  FPA Thermal Imaging Sensor  
with Dual Axis Microscan**

## Main Advantages and Features:

- Three FOVs (Including super wide FOV)
- Advanced detector / cooler technology
- Dual-axis, microscan
- Open frame, lightweight and small capacity construction
- One unit configuration (including electronics)
- Easy integration with host system
- Designed and qualified IAW MIL-STD-810

## Applications:

- Stabilized E/O Payloads for airborne, Heliborne and shipborne applications
- Ground based mast/tower mounted E/O sensor clusters
- Night sight for weapon systems
