

LAPIS

High Performance, Dual FOV, Uncooled Thermal Imaging Camera / Sight

Main Advantages and Features:

- High range performance
- Ruggedized construction
- Advanced uncooled detector technology
- High resolution, low pitch detector
- Zero acoustic noise
- Continuous electronic zoom
- Easy integration with hosting systems
- Low power consumption
- High MTBF
- Designed and qualified IAW MIL-STD-810F

Applications:

- Thermal sight for weapon stations
- Unmanned robotic platforms
- Naval E/O payloads
- Fence and perimeter monitoring
- High-end security and surveillance systems
