

# LOTUS-G

## Man Portable, Battery Operated Long Range 3-5 $\mu\text{m}$ Thermal Imaging Camera

High resolution, 3-5  $\mu\text{m}$  two dimensional FPA, 3 FOV Thermal Imaging camera  
for extremely long range observation applications

### Main Advantages and Features:

- Housed in a ruggedized sealed case including display, controls and battery compartment
- Outstanding long range performance
- High resolution
- Three FOVs
- Advanced detector technology
- Excellent image quality
- Local and remote control
- Battery powered
- Low power consumption
- Designed and qualified IAW MIL-STD-810
- Field and battle proven

### Applications:

- Field intelligence observation
- Border surveillance
- Coastal surveillance
- Anti-terror operations
- Long-range night sight for:
  - Laser designators
  - Target acquisition systems
  - Ground to ground weapon systems
  - Air defense systems
