

OPAL

Man Portable, Battery Operated, 3-5 μm Thermal Imaging Camera / Sight

OPAL is a dual FOV, compact and ruggedized thermal imaging camera / night sight for ground applications.

Main Advantages and Features:

- Advanced 3-5 μm two dimensional FPA detector / cooler technology
- Dual FOV
- Superior image quality
- Battery operated
- Low power consumption
- Integral biocular CRT display
- Ruggedized construction
- Designed and qualified IAW MIL-STD-810
- Remote controlled

Applications:

- Ground to ground observation posts
- Man portable target acquisition systems
- Anti-tank missile launchers sight
- Laser designators
- Air defense weapon systems
- Naval and coastal observation
